### Fall Conference & Annual Meeting

Courtyard Marriot - Grappone Center, Concord, NH

# NEW FRONTIERS IN NURSING

*...what would Florence do?*

## KEYNOTE SPEAKER: William H. Thomas, MD

The rapidly growing number of 'senior citizens' - with wide ranging health issues - presents one of the largest challenges to the nursing workforce. Whether or not you ever intended to work in geriatrics - you will find yourself involved at some point in caring for this population.

Dr. Bill Thomas is an internationally recognized authority on geriatric medicine and eldercare. He is the founder of The Eden Alternative, a non-profit dedicated to creating more life-enhancing long term care options. Eden now has affiliates around the U.S. as well as in Japan, Australia, Scandinavia, Europe, Canada and the U.K. From this came his Green House model of elder care - now being replicated in all fifty states through support from the Robert Wood Johnson Foundation. Dr. Thomas' presentation will touch on both this critical segment of healthcare reform and medication management with aging patients. See the NHNA website for further details.

## CONCURRENT SESSIONS ... (subject to revision)
